DETAILED ACTION

1. Applicant's submission for RCE filed on May 15, 2015 has been entered. Claims 48-94 are pending.

Election/Restrictions

2. Restriction to one of the following invention is required under 35 U.S.C. 121. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.
 - I. Claims 48-58, 59-79, 80-85, 92 drawn to utilizing a first electronic key device configured to generate an electronic ticket for providing a second electronic key device, classified in Class 726, subclass 9.
 - II. Claims 86-91 and 93-94 drawn to receiving, at a lock device, an encrypted random number and authenticating the key device based on the random number and the ticket, classified in Class 713, subclass 185.

The inventions are distinct from the other because inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, Invention I has separate utility involving a first electronic key device configured to generate an electronic ticket for providing a second electronic key device, Invention II has separate utility involving a lock device, which receives an encrypted

random number and a ticket and authenticates the key device based on the random number and the ticket.

See MPEP §806.05(d). Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement must include an election of invention to be examined even though the requirement be traversed (37 CFR 1.143).
